## GestaltView – Neural Handshake (Final All-Inclusive Package)

This package is a production-like demo of the Neural Handshake orchestrator wired to OpenRouter (free tier) → HuggingFace → Google Gemini → Perplexity. It includes a cleaned UI, aurora dark theme, Tailwind, and Vite ready-to-run project.

### Quick start

1. Unzip the package.

2. Copy `.env.example` → `.env` and add your keys.
